Polygon is an easy chair based on the modernist typology of a seat of modest dimensions. It fulfils the functional parameters but does not usurp the space. Each change in perspective transforms the triangles that define the orthogonal side view of the easy chair, into hexagons and other complex polygons. The end result is a product which seems familiar, even a little old-fashioned, yet is simultaneously distinctly modern.

The goal of the Design Awards is to identify, present and honour unique design trends which raise level of the design scene. The premium international prizes are awarded to top quality products and projects. The uniqueness of this armchair has been recognized and brought Polygon two awards:

Interior Innovation Award 2014 Winner  
German Design Award 2015 Winner

*Statement of the jury*

*Polygon is an extraordinary armchair, which arose from the modernist typology of a seat of modest dimensions. It fulfills the functional parameters but with its compact size does not usurp space. Each change in perspective transforms the triangles that define the side view of the armchair into hexagons and other complex polygons. An interesting concept, which subtly plays with perception and is thus never boring. Exciting.*
